Problem1 [d]

Shell Scripts [d]

FileName: Install.sh
*Install at least four
Programs. Script should
Have appropriate
Permissions e.g. (x)*

FileName: Remove.sh
*Should remove at least four
Programs. Script should
Have appropriate
Permissions e.g. (x)
Examples are LibreOffice, Calc, and etc.*

FileName: Remove.sh
*Should remove at least four
Programs. Script should
Have appropriate
Permissions e.g. (x)
Examples are LibreOffice, Calc, and etc.*

Group1 [d]

FileName:*SampleText
Permissions 751*

FileName:*SampleTex1t
Permissions 777*

Group2 [d]

Make a copy of SampleText to directory Group 2. Use this file to answer what is the importance of permissions. Change FileName to Answer1. Use approximately 200-300 and the editor of your choice.

Create another .txt file and provide approximately 200-300 words on how automating your server environment for security can be accomplished by scripting. FileName will be Answer2.
